

Professional Experiences

CrossBuffer Private LimitedAug/2024 - Present

Java Backend Developer

- Developed and optimized a U.S. Payroll Calculation module, implementing federal, state, and local tax rules (FIT, SIT, FICA) with accurate gross-to-net computations.
- Integrated payroll workflows including employee timesheets, deductions, benefits, tax brackets, overtime rules, and pay period processing.
- Enhanced system reliability and performance by building scalable backend modules using Java, Spring Boot, and SQL, ensuring error-free payroll generation and compliance with U.S. payroll standards.

Larch Soft Private LimitedFeb/2023 - Jul/2024

Java Backend Developer

- Developed robust backend services using Java, Spring Boot, Hibernate, and SQL, ensuring scalable and secure server-side architecture.
- Designed and implemented RESTful APIs for smooth integration between backend components and frontend interfaces.
- Built and maintained a University Management System project, handling modules such as student management, staff management, courses, and authentication workflows.
- Optimized database queries and implemented efficient data handling, improving system performance, reducing response time, and ensuring smooth operation of all university modules.

Internships

QuantumBit Technologies Private LimitedFeb/2022 - Jan/2023

Java Backend Developer

- Developed REST API endpoints for CRUD on academic and mobile record domains, enforced validations, and ensured data integrity.
- Implemented object-relational mapping between Java and MySQL using Hibernate ORM.
- Created technical documentation to support onboarding, maintenance, and feature delivery.
- Used Postman for API testing, collaborated with the team on version control (Git) and peer reviews.

Projects

Music Streaming

- Implemented secure CRUD for playlists/songs with validations and role-based admin controls.
- Integrated JPA/Hibernate with MySQL for seamless persistence and optimized queries.
- Tech Stack: Java, Spring Boot, SQL, Hibernate, MVC Architecture, Git, Postman

Skills

- Computer Language: Java, SQL, HTML, CSS, JavaScript
- Frameworks / Libraries: Spring Boot, Hibernate
- Additional Courses: Data Structure and Algorithms, OOPs
- Tools & Technologies: Git, Visual Studio Code, IntelliJ IDEA, Postman

Education

Year	Degree/Examination	Institution/ Board
2024	Master Of Computer Application	Sandip University
